

THE ART OF PERFORMANCE

BOLON

GREAT DESIGN IS MORE THAN MEETS THE EYE

By driving innovation in the field of woven design, we offer high-performance design floorings that are as functional as beautiful. Our floorings come with outstanding durability properties, are easy to clean and maintain, and are produced using renewable energy and recycled material. You see, for us, great design is more than meets the eye.

In 2020 we celebrate beauty and function in the design concept, THE ART OF PERFORMANCE:

DESIGNABILITY / SUSTAINABILITY /
CLEANABILITY / DURABILITY /

DESIGNABILITY / Think different, go creative, think outside the box. We've got the design for you.

SUSTAINABILITY / Waste, leftovers, unwanted. Not for us. We use ours, and others, production waste to create beautiful design-floorings.

CLEANABILITY / Oops, uh-oh, oh no. Don't worry, our floorings are easy to clean and maintain. So go ahead, make a mess.

DURABILITY / Slow down, relax, take a nap. Our floorings are almost boringly durable. 10 – 15 years is a long time.

DESIGN THE UNEXPECTED

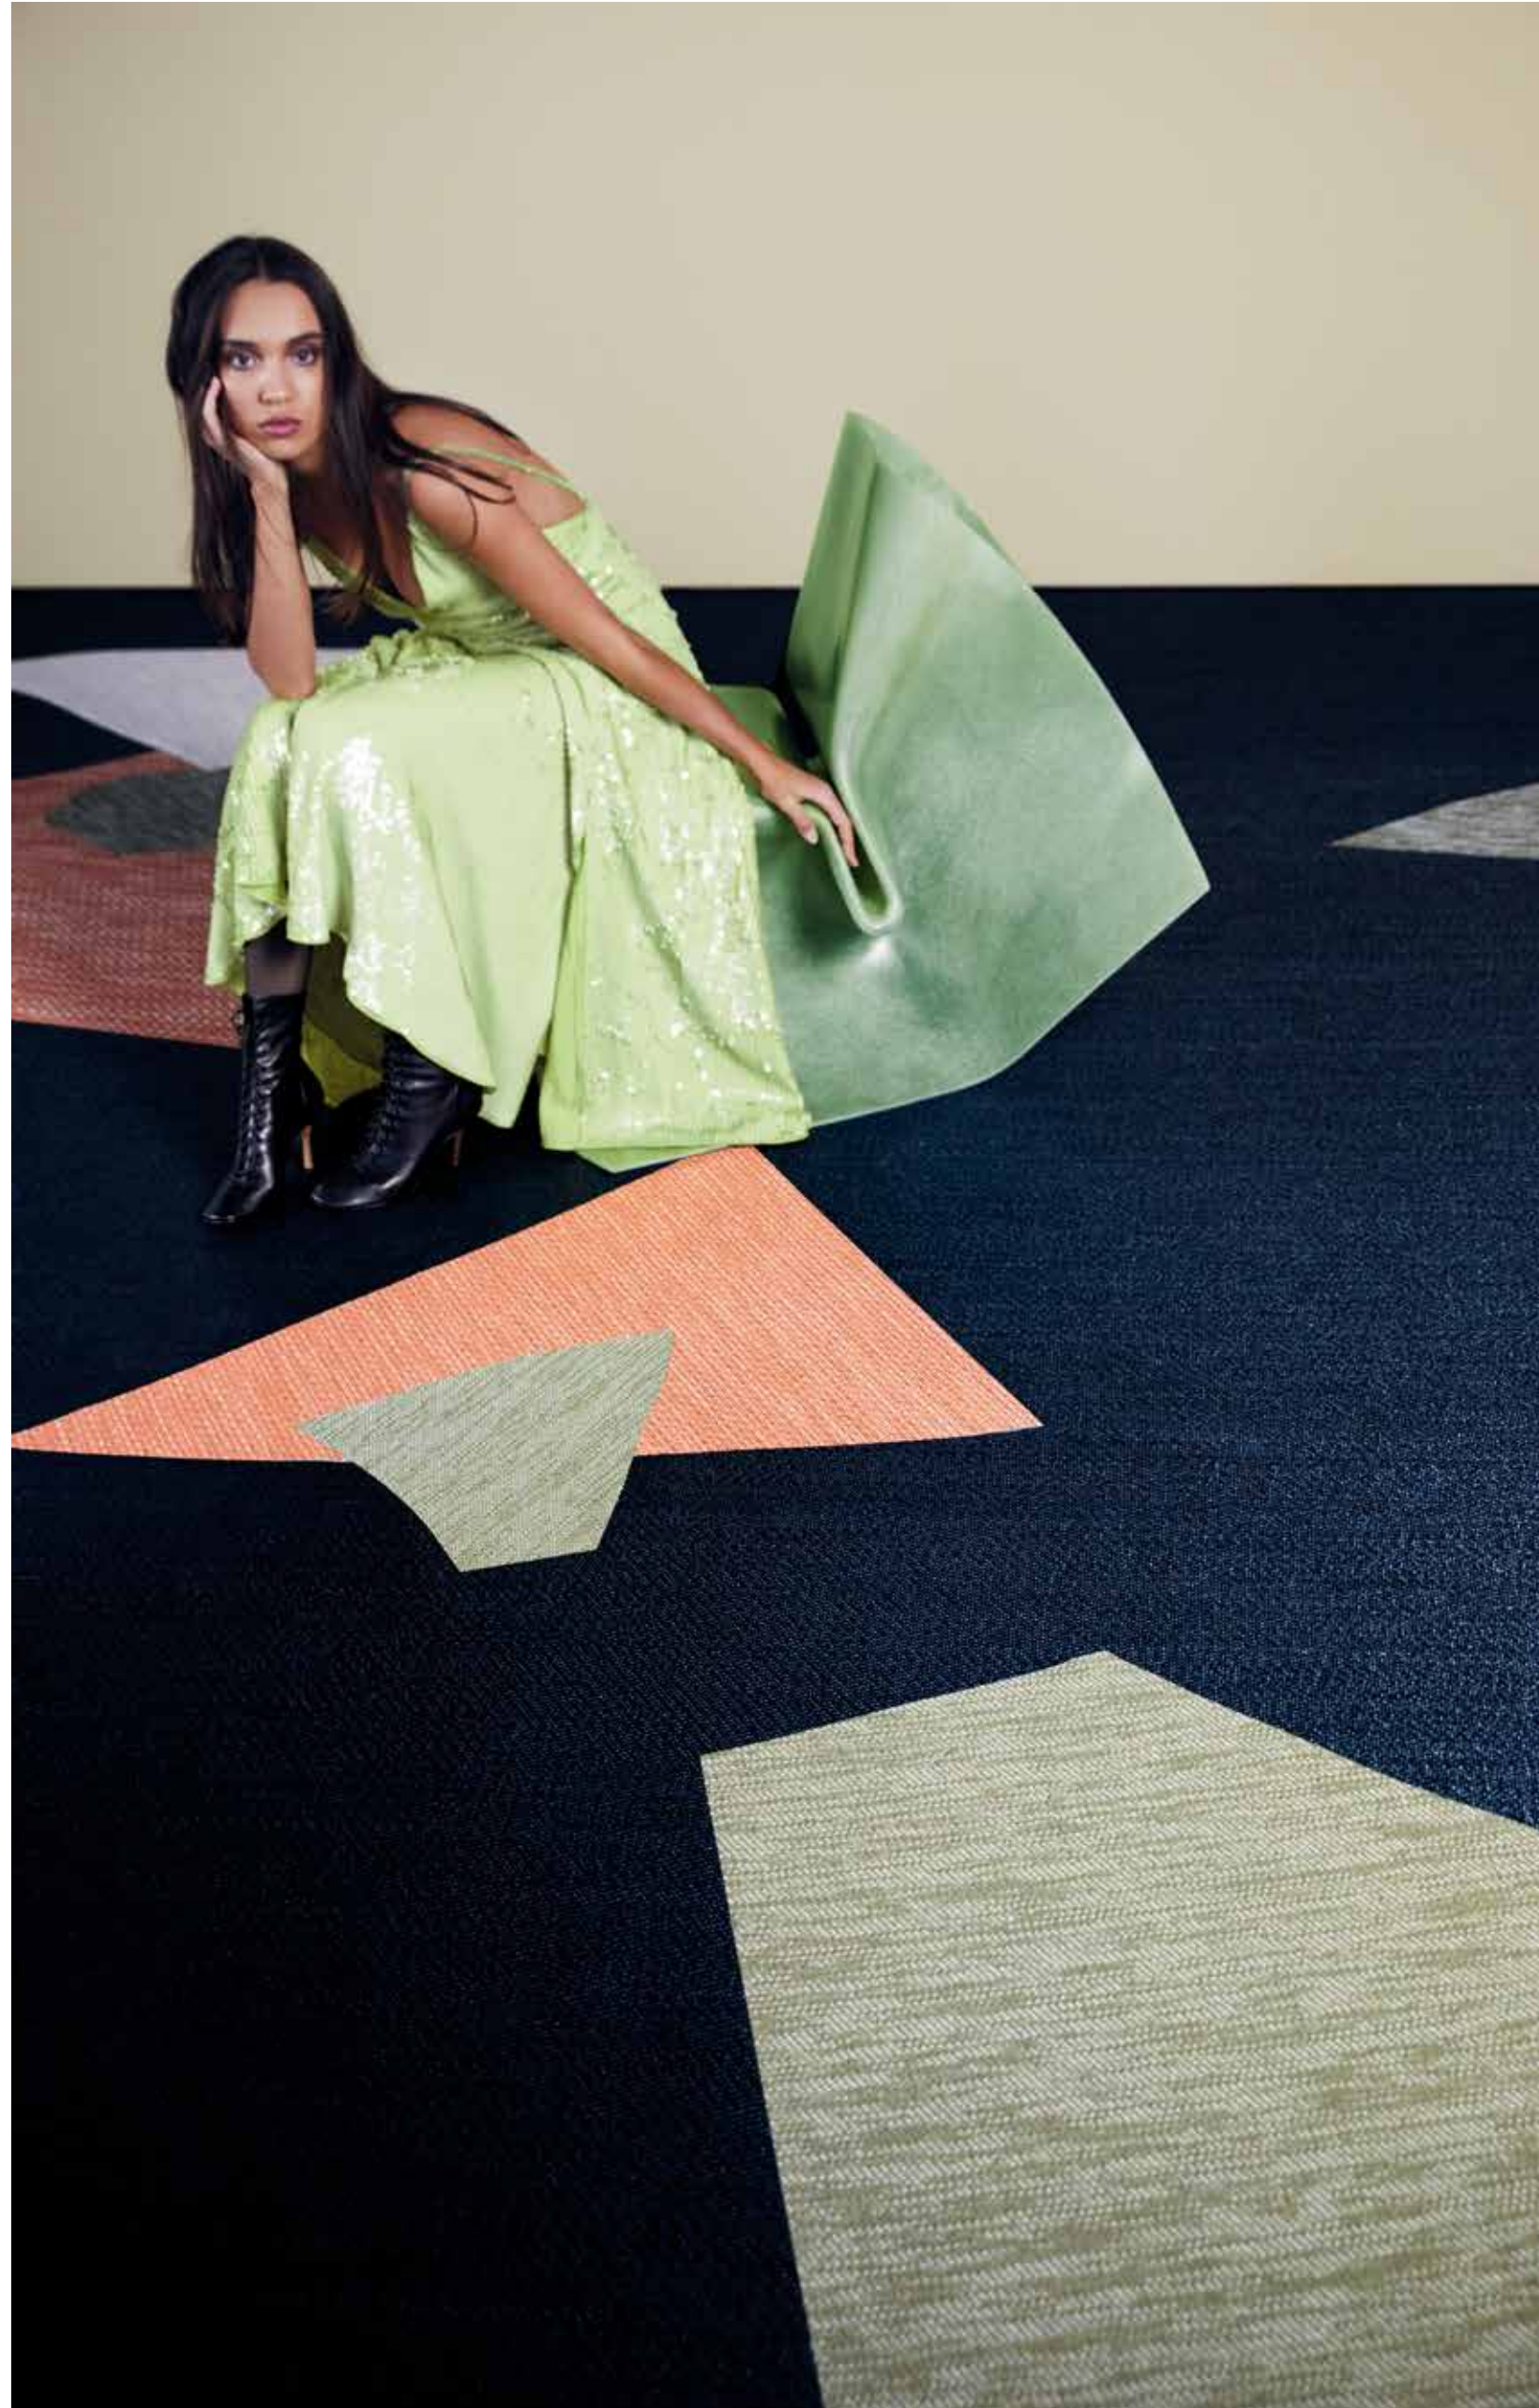

Bolon flooring provides you with beautiful and functional design possibilities to use in your interior project. With a broad palette of shapes, colors, and expressions, only your imagination sets the limitations. Our collections are designed, developed, and produced in Ulricehamn, Sweden, always based on the characteristic Bolon-yarn and the unique woven structure. So, let your imagination free and create floorings that makes your interior project stand out and last.

and tiles (12 shapes)

HONEST SUSTAINABILITY

We integrate sustainability in every step, from design, production to recycling. All our products are produced using renewable energy and recycled material.

At our onsite recycling plant, we transform production waste into backing layers of our flooring. In fact, we recycle not only our own waste but also the production waste of other companies. This enables us to produce design flooring with less use of virgin materials. And of course, all our floorings are free from hazardous plasticizers and stabilizers. For information about our products' environmental impacts we have independently verified EPDs (Environmental Product Declarations), providing transparency and comparable information.

100% of our collections

Production with
100% renewable energy

100% free
from toxins

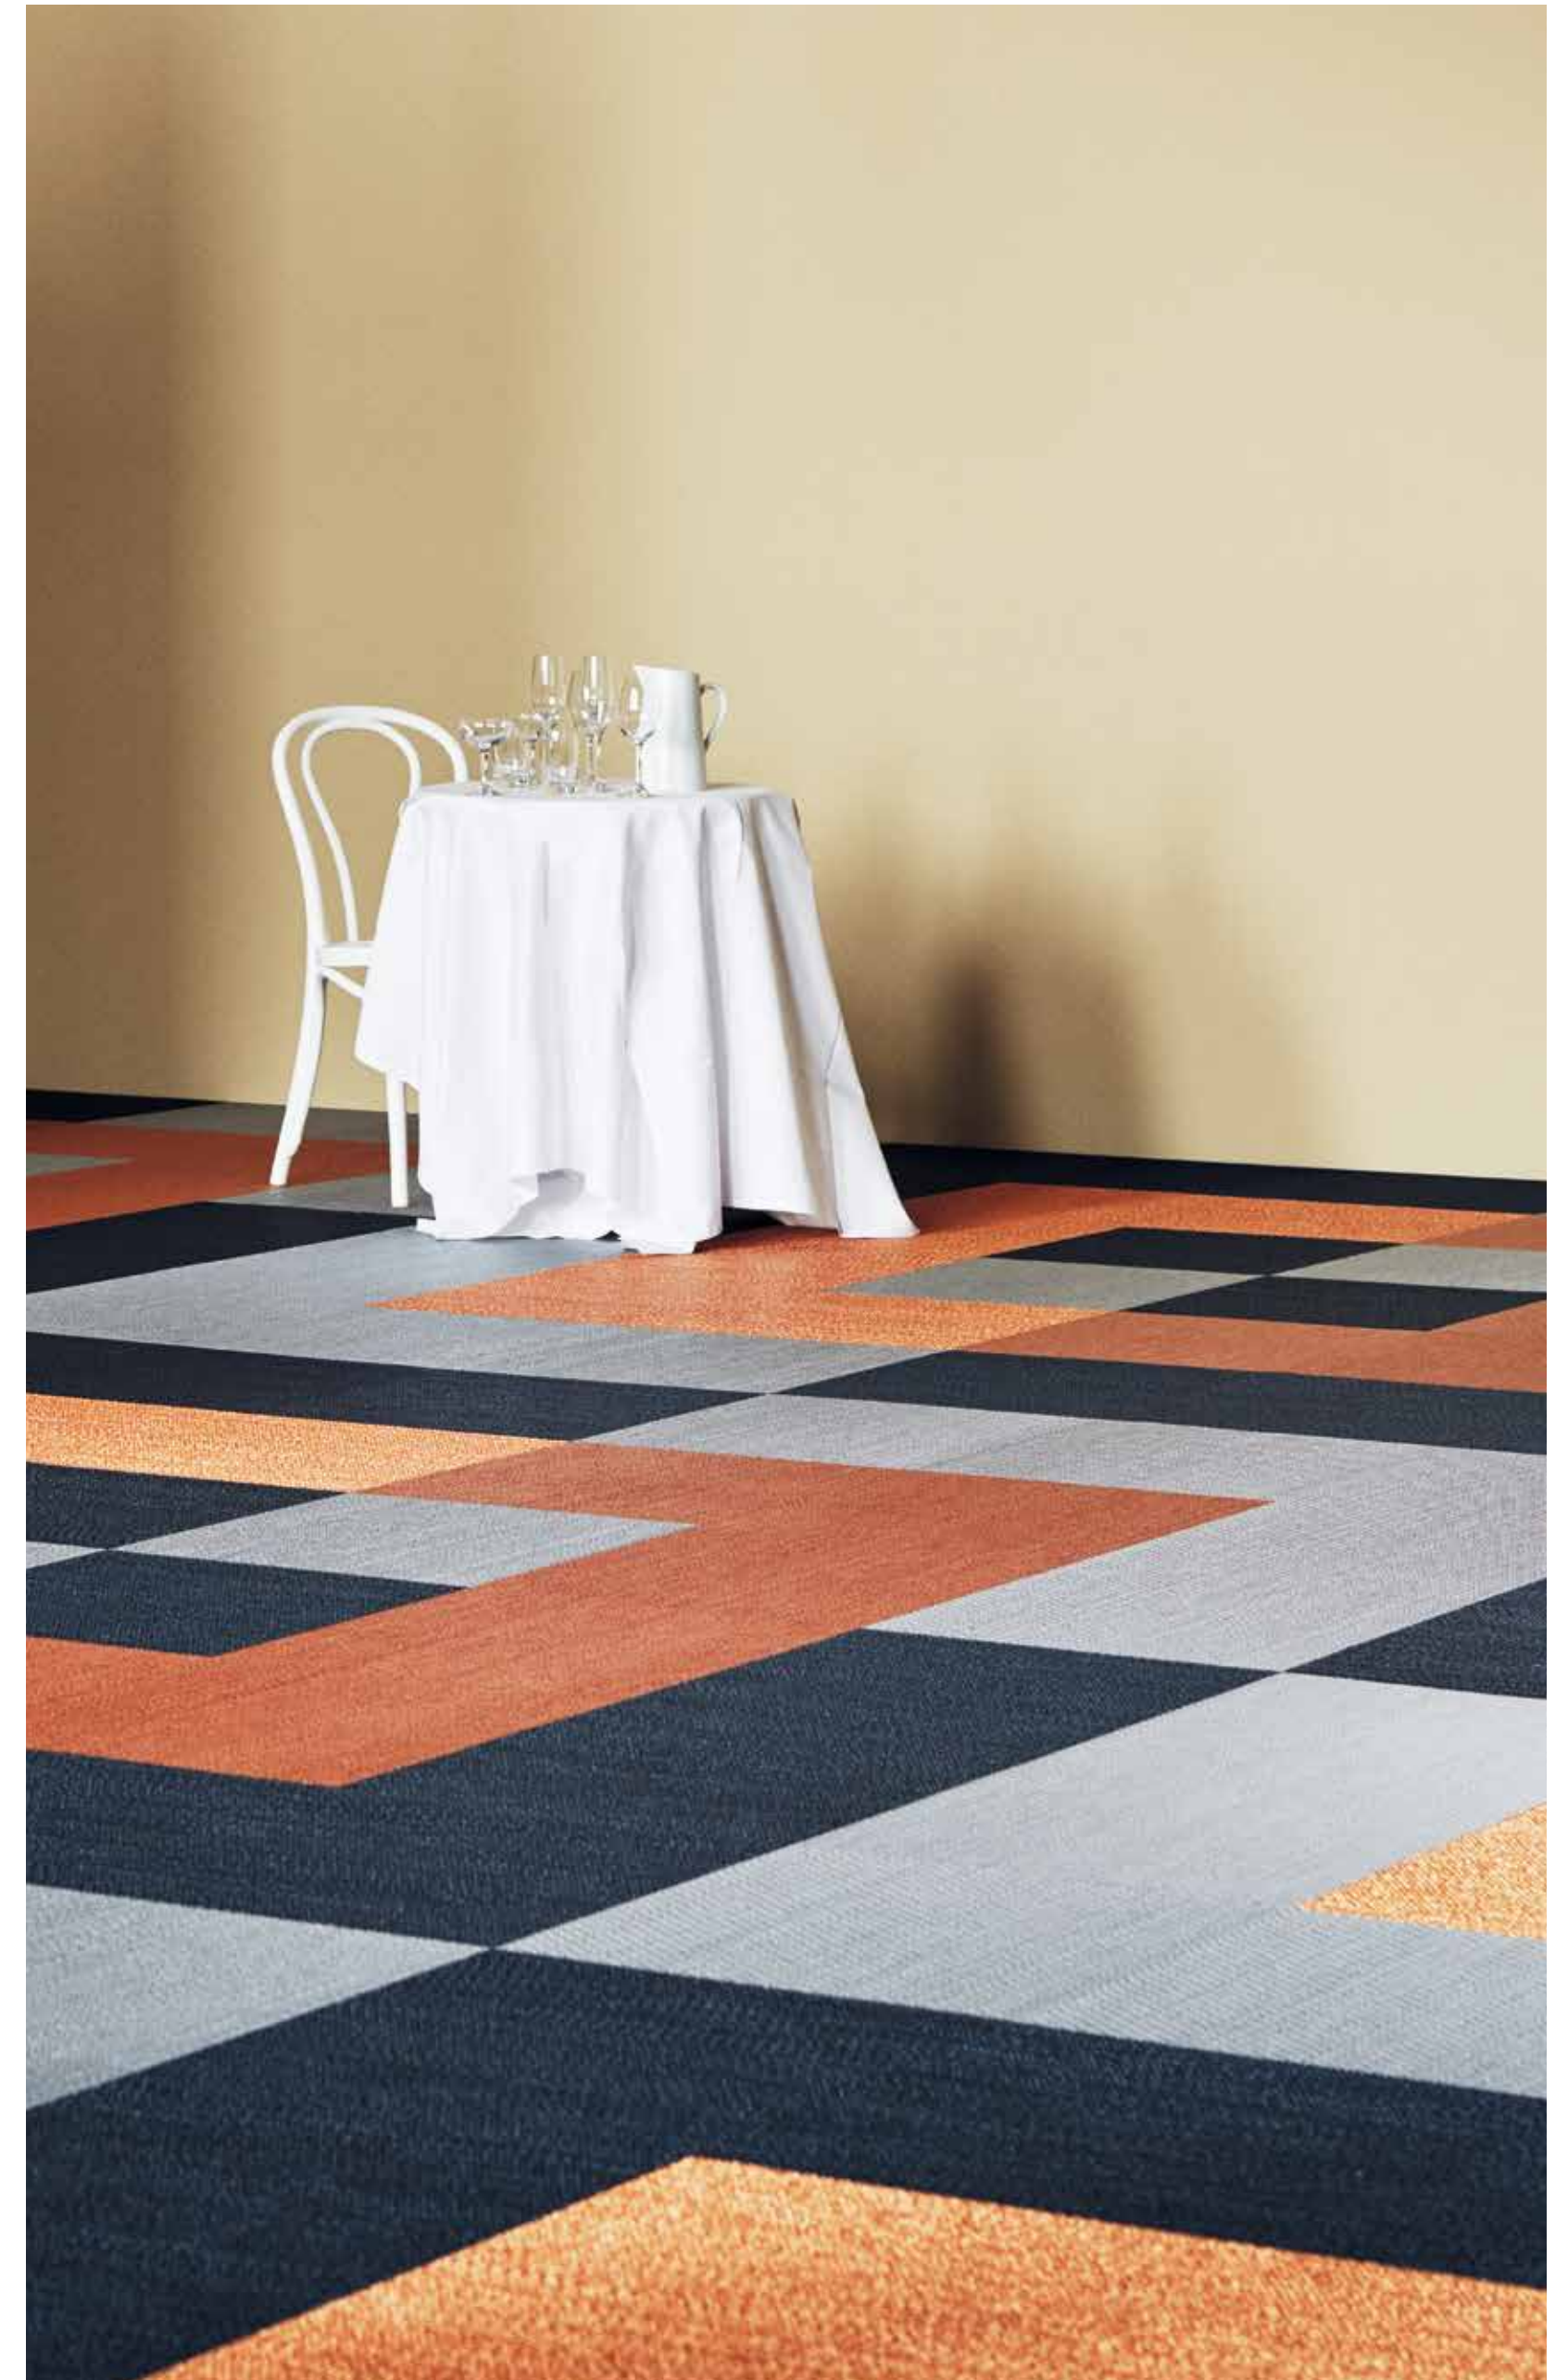

CARE AND CLEANING MADE EASY

Bolon floorings are easy to clean and maintain. At ninety-nine times out of a hundred, cleaning can be performed with a vacuum cleaner, machine, brush, mop, or water. All floorings are impervious and resilient enough for almost any spill or mess. The compact weave also means that there are no places in which dirt and debris can hide. Our ambition is that our floorings will create a great first impression – the second, third, or even the hundredth time.

Easy to clean,
easy to use

Simple stain
removal

Restorable to almost
new condition

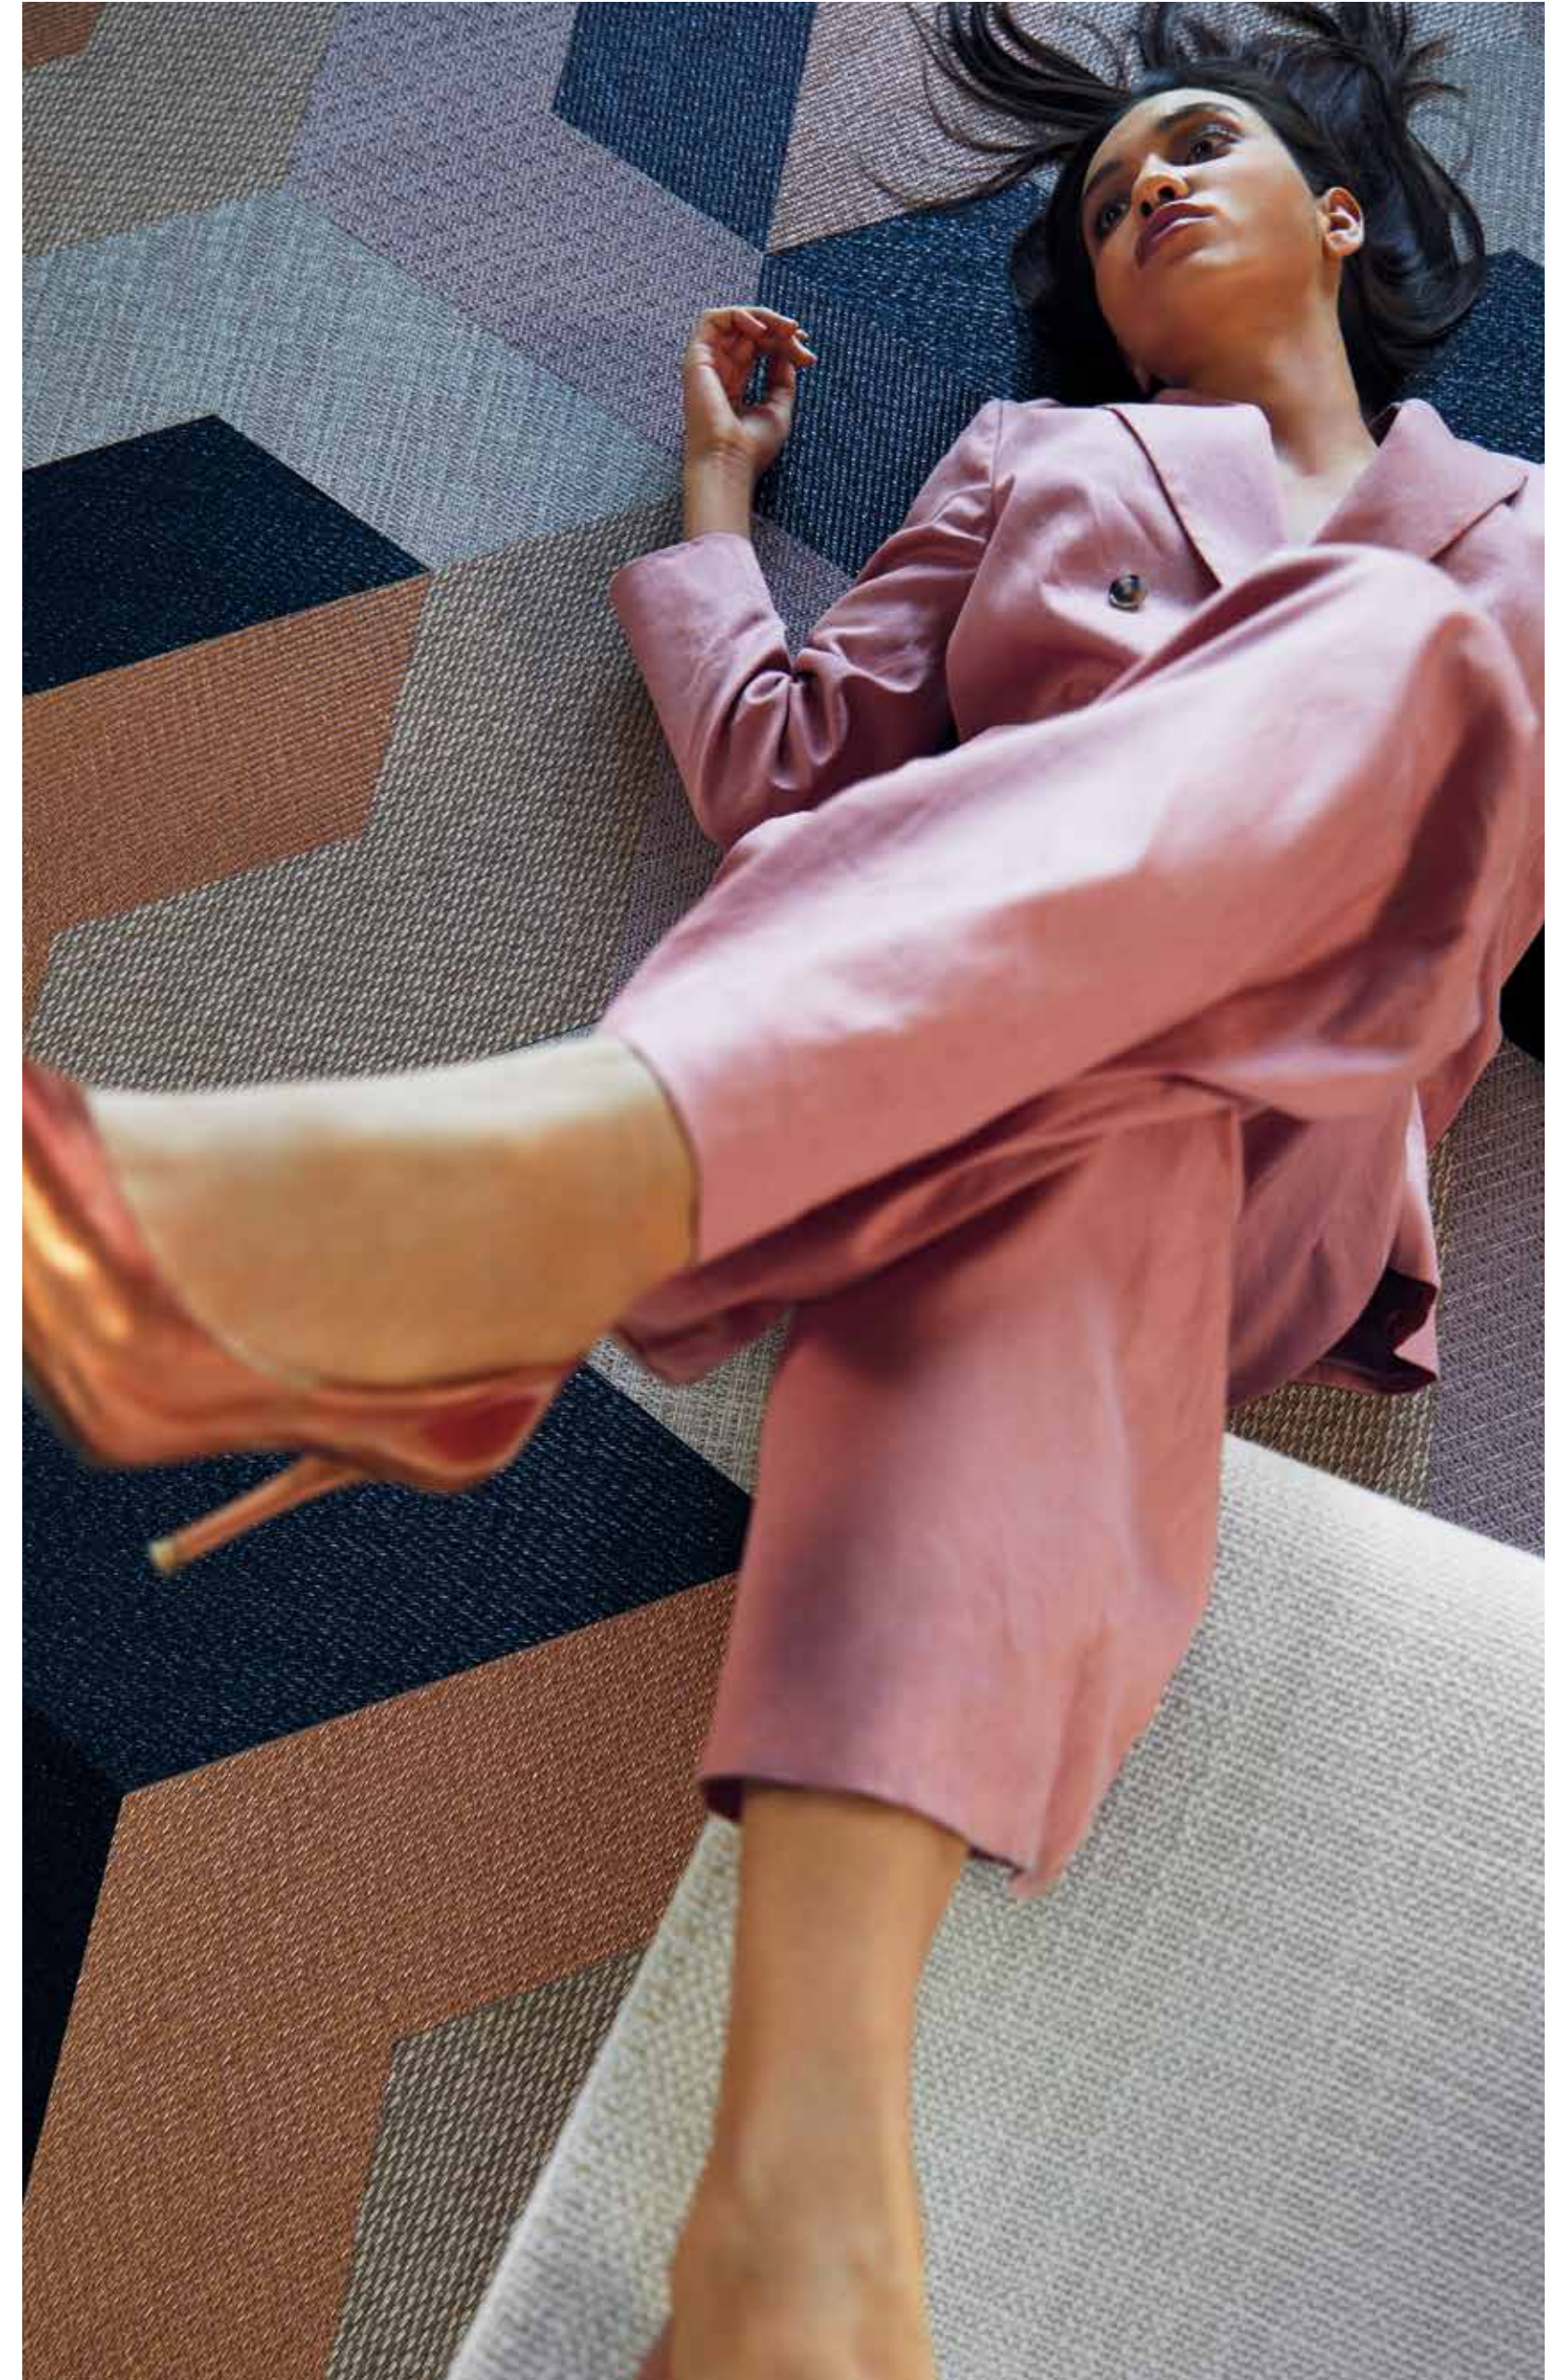

LONG LASTING FLOORINGS

Our resilient floorings will not wear, flatten, or dull. They are designed and produced to last, making them perfect for high-intensity, commercial environments. The solid backing layer and the compact weave makes them impervious to liquids, which further improves the performance qualities. We believe that great design is design that lasts.

Hard wearing
vinyl flooring

10- or 15-year
warranty

Durability class:
32 or 33

FOR US,
GREAT DESIGN
IS DESIGN THAT
LASTS.

PROOF OF PERFORMANCE

LIFE CYCLE ANALYZE FOR RAW MATERIAL

Ernst and Young has certified Bolon as conforming with Best Practice PVC environmental guidelines. Bolon's PVC suppliers and their raw materials attained have been assessed for production to the highest environmental standards.

LIFE CYCLE ANALYZE FOR FLOORING

A selection of our products has been assessed using BRE Global's Environmental Profiles methodology and achieved an 'A' rating for Offices'.

Lifecycle assessment according to the international standards EN 15804 and ISO 14025. Transparent environmental verification of the Bolon flooring.

Our Greentag rating covers social responsibility, product eco-friendly composition, VOC emissions and durability.

INDOOR AIR

Bolon is FloorScore certified for indoor air quality (emissions), contributing to a higher LEED rating.

M1 stands for low emissions. The classification presents emission requirements for the building materials used in ordinary work spaces and residences with respect to good indoor air quality.

Classification of low emission for indoor air quality. According to French regulation on VOC.

HEALTH

The Global GreenTag Product Health Declaration™ PhD recognises progressive manufacturers who fully disclose the toxicity information of their product.

Bolon flooring is recommended by The Norwegian Asthma and Allergy Association. NAAF is committed to improving the wellbeing of those diagnosed with asthma and allergies.

COLLABORATIONS

We are a member of the Swedish Flooring Industry recycling and waste management program.

OTHER

BASTA indicates that our flooring accelerates the phasing out of dangerous substances from construction products.

Our product meets CE labelling requirements as specified in CPD directives for safety, health and environment.

There are building product declarations for all our products. These declarations enable transparency throughout the construction phase.

Our products are certified for ECOproduct, a sustainability certification rewarding companies that are selecting environmentally friendly materials and products in construction projects.

Our products content declarations including chemicals are registered with the flooring industry central database in Sweden.

A voluntary system for conveyin environmental information about build products.

The SundaHus environmental certification database contains more than 70,000 products grouped into the categories A, B, C, and D. Bolon is placed in Category B, which certifies full control of the production chain all the way down to polymer production.

The DGNB navigator provides, among other things, architects and construction managers with relevant information about the product that is easy to download and understand. The information is based on data from the EPD.

Paper by Arctic Paper, Amber Graphic is FSC® and PEFC® certified. Bolon is not responsible for any printing errors.
